PRADEEP SUNDARAM

CG Generalist | Environment Artist

London, England | prad.sundaram@gmail.com | pradsundaram-ui.github.io

EXPERIENCE

Industrial Light & Magic
London (2026 – Present)

Generalist / Environment Artist

I moved to the Industrial light and Magic London office for a new challenge and continue to push my creative boundaries. As part of the Environment I provided a generalist skill set that related more to Set Builds, Asset Creation, Shot Work and communicating with different departments across projects to ensure a smooth seamless integration through sequence completion.
- As part of the Spiderman team i was responsible for Set Construction, Asset creation, texturing and lookdev and scatters of destruction All done through using houdini procedural tools and ILMs in house tools.
- As part of the Avengers team my responsibilities included maintaining shot consistency with shot edits and overrides to the set. Asset creation and vegetation creation, Hero model work and one shot construction that required quick turn arounds.
- a major responsibility was presenting our environments through sequence shots, which required slaps comps and slight comps in nuke, these had to be presented near enough that the entire context of sequence could be viewed by management and supervisors

Sydney (2022 –2025

Generalist / Environment Artist

I was hired to provide a generalist skillset. Joining at ILM I am tasked with learning on the job as well as providing assistance to environment builds, Asset creation and comp slaps for production. Anything that was needed from other departments was tasked to the Generalist department, which was an exciting, fast pace and new experience.
My responsibilities included
-Aquaman and the lost kingdom I was tasked with using my skill set in multiple different disciplines. Modeling, Texturing, lookdev, Vegetation animation, Scatters, Slap comps and anything else that was asked of me.
-for Asokha the show was primarily done in 3ds Max, another software I had not used outside of ILM.
-Scene assembly, modelling, shading, lighting and scattering
- taking shots 90% of the way to completion and developing the look of the sequence before passing off to the comp department.
- Wicked my responsibilities were scene assembly, asset creation, lookdev and scatters area of this project
- Rendered and slapped comp sequences with 80+ shots each week to meet tight deadlines

Wicked – Feature film
Alien: Romulus – Feature film
Knuckles – Television series
Ahsoka – Star Wars television series
Aquaman and the Lost Kingdom – Feature film

Luma Pictures
Melbourne, Australia 2021

Environment Artist

Contracted to work as an Asset and Environment artist and provide a more all round generalist skillset .My responsibilities included
- mapping out and planning a set build for a real world New york times square location.
- creating high detail models of the building, props and roads all located within times square
- creating textures and final lookdev for the buildings and props within katana.
- Set builds in katana alongside final lookdev.
- using onset lidar to creature high detail set extensions on Thor: Love and Thunder

Asset Artist / Environment Modeller / Environment Artist

Contracted to work as an Asset and Environment artist for this project. My responsibilities were to create props and full scale environments to be used for a children's animated TV show.My responsibilities included delivering high quality assets with good topology and UV's to be passed on to the surfacing team. Models would also require sculpting in Z brush so the workflow was done through Autodesk Maya and Zbrush

Friend Space – 3D animated TV series

Pony Up Pictures
Brisbane, Australia2018–2020

Environment Artist / Asset Artist / Prop Artist

Contracted to work as an Asset and Environment artist for these projects. The asset department was to be finished with all three feature films to be completed within 18 Months, due this we faced tight deadlines and quick turn around when it came to the finishing Assets and full sets.My role within the Asset department evolved to be more complex as the job went on. With a small team of only three artists we were given the responsibility of handling multiple sets each and providing quick turn around due to the tight timeframe.

my responsibilities include

- provide assistance with the pre-production, taking the the story boards provided to proxy sets with placeholder cameras
- create Assets and sets from scratch. Going from previs to finalized sets in only a matter of months
- texture and provide lookdev for all hero assets and move that into the main set build, doing this through texturing, painting and procedural shading in maya redshift renderer.
- the environment team was also responsible for the lighting and looks of each of the shots.

Wishmas Tree– 3D animated feature film
Combat Wombat – 3D animated feature film
Daisy Quokka – 3D animated feature film

Future Associates
Sydney, Australia2018

CG Generalist

I was hired at Future Associates to provide a cg generalist skill set to the current team. My role covered a variety of disciplines related to environment work, Character and asset Modelling, Rigging, Character Animation and rendering. I did not have vast experience with a few of these skills, but I had the trust of my leads to pick up and learn in a fast paced environment and I was able to produce the results that were well received by the client.

Environment Artist /CG Generalist

Hired as an Environment Artist, CG Generalist due to my expanding general skillset. Working on a Global TVC for the launch of a leading car company's latest model, we worked on multiple different environments that the car would traverse throughout the commercial. The sets were a mix of both organic and hard surfaced assets, required high level detail and procedural shading and texturing. Everything was mostly done within Maya

"The 12th" Toyota anniversary film – Global TVCs

Iloura
Sydney, Australia2017

Contract Modeller

Was hired as a modeller for this role. Primarily using maya to model organic and hard surface assets for different sequences across two different shows. It was my first experience with a Global IP such as marvel so the tasks were demanding, and paced. I worked closely with the other upstream departments to provide quick edits to any set features, asset or prop they required.

Thor:Ragnarok – Feature films
Crazy Rich Asians; Thor: Ragnarok – Feature films

Animal Logic
Sydney, Australia · 2017

Digital Artist, Modelling

I was hired as a modeller for this role, tasked with the responsibility of creating lego sets and assets using a mixture of Maya and LLD, the lego proprietary design software. With the client being a global IP such as lego the modelling had to be very precise and clean. Ninjago was unique for a lego movie as it blended natural and organic forms with lego pieces to create a unique look and feel to the movie.

I worked mainly in zbrush, maya and LLD.

SKILLS

Over my time in the industry working across multiple studios and global projects I was able to develop a wide and varied skills set that allow me to accomplish tasks of any difficulty, scope or range. These skills give me the ability and confidence to tackle any task assigned to me with efficiency and speed.
Some of the skills I developed are -
-Environment modelling, layout and design
-Hero and Asset and prop creation
-Ingestion from other vendor
-Texture painting in photoshop and procedural texturing in packages like Substance Painter
-Lookdev and shading
-DMP and 2.5D projection
-Lighting
-Scene assembly
·Scattering - creating organic forests and landscapes, destruction and

SOFTWARE

I have learned to use multiple software across my time in the industry. I pride myself on being able to learn in a high pace environment and using any tool to do whatever it takes to get the job done.
Software
- Maya
· ZBrush
- Houdini
· 3ds Max
- Speedtree
- Substance Painter
- Nuke
- Katana
Renders
- Arnold
- Renderman
- Vray
- Redshift

EDUCATION

University of New South Wales 2013 – 2014
Master of Digital Media, specialising in 3D animation and special effects

- Theory-focused programme developing an understanding of storytelling and media creation.

University of Canberra 2009 – 2012
Bachelor of Media Arts and Production

- Foundations of filmmaking and digital media production, with a year-long collaborative thesis film.
- Electives in website design, sound design and creative blogging; all coursework centred on collaborative group work.
